

CREATING ACCESSIBLE MICROSOFT POWERPOINT 2007/ 2010 PRESENTATIONS

Slide Layouts

Using slide layouts provided within Powerpoint will ensure that files have correctly structured headings and lists, and proper reading order:

Creating Slide Layouts

- I. Select Home> New Slide, or select the New Slide button from the default tool bar.
- 2. Choose from the slide options menu the desired layout.

The best forty boulders and straints that they be the first and straints to the first and straints and strain

Alternative text for Images

Images can be given appropriate alternative text in PowerPoint. This alt text is read by a screen reader in a PowerPoint file and should remain intact when exporting to HTML or PDF.

PowerPoint 2007

See Attent

 Right-click on the image and select Size and Position. A dialog box will appear.

ueb browders display alternative, text unde pictures are beting or if they are metary. Web search engines use alternative tact to heb fact Web pages. Alternative Text is a few used to access users om despitives.

 Select the Alt Text tab, and replace the filename with appropriate alternative text.

PowerPoint 2010

- 1. Right-click on the image and select Format Picture.
 A dialog box will appear.
- 2. Select the Alt Text tab on the sidebar. Enter appropriate alt text to the Description field, not the Title field.

Data Tables

- PowerPoint can style rows and columns so they appear as data tables, but there is no way to add content in a way that will be identified by a screen reader.
- If your presentation contains more than the simplest tables, and if you have Adobe Acrobat, *consider saving your presentation to PDF* and adding the additional accessibility information in Acrobat Pro.

Links

PowerPoint automatically creates a hyperlink when a user pastes a full URL onto a page. These may not make sense to screen reader users, so more information is needed.

Editing Hyperlinks

- . Select a hyperlink, right click, and select *Edit Hyperlink* or CTRL + k.
- Change the URL in the Text to Display field to a more meaningful description.

Outline and Notes Panels

PowerPoint contains two panels that can be used to enhance accessibility: the *outline panel* and the *notes panel*.

Outline Panel

- The *outline panel* contains a *text outline* of the content that appears in your slides.
- Reviewing this panel can help ensure the content on the slides is logically sequenced, that slide titles are unique and meaningful, and that reading order is appropriate for any user.

GOALS

Notes Panel

- The notes panel allows the speaker to add notes and information that will not appear on the slides.
- Placing image or chart descriptions in this area should be avoided. This information *may not be accessed* by a screen reader, so use with caution.

Other Principles

- Ensure that font size is sufficient. If your presentation will be viewed on a projector, font size may need to be even larger.
- Provide sufficient contrast. If your presentation will be viewed on a projector, sometimes the contrast needs to be even more pronounced.
- Do not use color as the only way to convey content.
- Avoid automatic slide transitions.
- Use simple slide transitions when possible
- Use simple language.
- Check reading order of text boxes that are not part of the native slide layout. They are usually the last thing read by a screen reader.
- If you have embedded video, ensure that the video is captioned, and that the player controls are accessible.
- If you have embedded audio, include a transcript.
- brief and do not distract from the most important content on the page.

PowerPoint 2010 Accessibility Checker

PowerPoint 2010 includes an accessibility resource that identifies and repairs accessibility issues.

Running the Accessibility Checker

- Select File> Info> Check for Issues> Check Accessibility.
- 2. The checker presents accessibility errors, warnings, and tips on how to repair the errors.

Pptx format

The "pptx" format supports *PowerPoint 2007 and newer*. For a more *widely supported file format*, consider saving files as PowerPoint 97-2003, or "ppt" format.
